

Emergency Briefing on Climate and Nature

Opening Session

September 30, 2026 Tokyo

Energy Systems: Kazunari Sasaki, Vice President and Professor, Kyushu University

Born in Kyoto in 1965. Graduated from the Department of Inorganic Materials Engineering, Faculty of Engineering, Tokyo Institute of Technology in 1987. Completed the Master's program in Nuclear Engineering, Graduate School of Science and Engineering, Tokyo Institute of Technology in 1989. Obtained a PhD in Engineering from the Federal Institute of Technology Zurich, Switzerland in 1993. Visiting Researcher at the Max Planck Institute for Solid State Research, Germany in 1995. After 10 years in Europe, became an Associate Professor at the Graduate School of Science and Engineering, Kyushu University in 1999. Became a Professor at the Faculty of Engineering in 2005. Became a Principal Professor in 2011, and Vice President in 2016. Previously served as Director of the International Research Center for Hydrogen Energy and Director of the Industry-Academia Collaboration Research Center for Next-Generation Fuel Cells. Currently, Vice President of Kyushu University (Research Promotion (Decarbonization), Industry-Academia-Government Collaboration and Intellectual Property), and Principal Professor at the Sustainable Hydrogen Institute. Primarily engaged in materials and process research for fuel cells and other related fields, leading the Kyushu University "Hydrogen Project". He also serves as the chairperson of the Hydrogen and Ammonia Policy Subcommittee of the Comprehensive Resources and Energy Research Council, a member of the Decarbonization Fuel Policy Subcommittee, a member of the Hydrogen Artery Concept Realization Council, and a director of Kyushu University OIP Co., Ltd.
